### DETAILED ACTION

This Application has been examined. The claims 1-14, and 17 are pending. The examination results are as following.

#### *Reasons For Allowance*

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a liquid crystal display (LCD) controller generating control signals for displaying, in response to pixel data on a liquid crystal panel having a plurality of pixels, the LCD controller comprising a dithering pattern register section, comprising a first, second, third, and fourth dithering pattern register each for storing binary data of a gray level having a denominator value; a modular register counter for performing a counting operation to determine a binary value of a most significant bit; multiplexers for generating data patterns for the grayscale; a selection means for selecting and generating a corresponding bit of a data pattern corresponding to the pixel. The combination of the closest Prior Art of Tiandrasuwita (US 6,198,469), Ishi et al. (6,288,698) and Kim (US 6,348,909) disclose a similar system, however, they fail to teach wherein the gray level of the binary data of each of the first, second, third, and fourth dithering pattern registers has a same bit number as the denominator value of its respective dithering pattern register as claims 1 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
